**DETAILED ACTION**

***Allowable Subject Matter***

1. The indicated allowability of claims 31 and 32 is withdrawn in view of the newly discovered reference(s) to O'Neill 5,358,149. Rejections based on the newly cited reference(s) follow.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 31 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

I- Claim 31 recites the limitation "the inside" in line 9. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Neill 5,358,149.

O'Neill discloses a pump for mounting on a receptacle as seen in Figure 1, which comprises a dispenser orifice (6), a pump body (40), the pump body including a spike

(48), a moving body (8) being movable relative to the receptacle, including a pushbutton (4) and defining with the pump body a pump chamber (55) of variable volume, the moving body including a skirt (51) defining a passage via which substance present in the chamber is delivered toward the dispensing orifice as seen in Figure 3, the skirt co-operating with the spike when the pump is at rest to isolate the inside of the skirt from the pump chamber as seen in Figure 1, an insert (58), the pushbutton comprising two portions, one of which defines the dispenser orifice and is stationary relative to the insert as seen in Figures 1 and 2.

***Allowable Subject Matter***

6. Claims 1-30 are allowed.

***Response to Arguments***

7. Applicant's arguments filed 4/11/2008 have been fully considered but are moot in view of the new ground(s) or rejection.

***Conclusion***
